Experienced JavaScript Developer skilled in React, JavaScript, TypeScript, and Next.js.

PROFESSIONAL EXPERIENCE

Dhiwise.com - Figma to Code tool

June 2024 - June 2025

Software Development Engineer - I

- Took ownership of the Dhiwise web application within two months of joining, overseeing bug fixes, new feature implementations.
- Developed React Native web preview functionality and integrated React Native web support into the Figma to code web app, managing the workflow from app creation to live preview.
- Worked on the Streaming module for Rocket.new (AI base app builder like loveable), managing SSE connections on the frontend, including resume handling and stream restart functionality to maintain seamless real-time updates.
- Implemented the Figma-to-Code module for Rocket.new, enabling app creation from Figma files with multi-frame handling, validations, and real-time build updates.
- **Tech Stack** - React, JavaScript, TypeScript.

Empiric Infotech LLP

Mar 2023 - June 2024

ReactJs/NextJs Developer

- Developed end-to-end automation for a Shopify-like e-commerce platform using Next.js for both frontend and backend. Utilized Firebase, Google Cloud, and Vercel APIs to create a custom API-driven store creation pipeline.
- Designed and implemented reusable authentication components, custom hooks, and utility functions for managing Firebase authentication and CRUD operations in React, which were later adopted across organization
- Managed the full-cycle development of a B2C web application with Next.js and Firebase, enabling users to browse and book various services, apply coupons, schedule appointments, and access other customer-oriented functionalities.
- Played a role in enhancing an Ed tech web application by focusing on user authentication, card features, and resolving bugs.

Soft Web Pos

Sep 2022 - Feb 2023

JavaScript/ReactJs Developer

- Implemented order and product management features in a POS application to improve inventory handling and sales.
- Created a drag-and-drop dashboard using JavaScript to enhance usability and customization.
- Developed a customizable invoice design tool in the admin panel, allowing users to adjust branding and layout.

Co-Founder & Developer

Oct 2023 - Aug 2024

AUM-Soft

[LIVE](#) | [GITHUB](#)

- Co-founded a startup focused on helping e-commerce sellers monitor their orders handled by marketplaces like Amazon, Flipkart, and Meesho
- Developed a system to log and track the status of each order from dispatch to final delivery or return to the seller's warehouse.
- Addressed operational issues like stolen or missing orders by providing sellers with a centralized dashboard to monitor order movements and statuses.
- Operated the startup before discontinuing as the market incident rate for such delivery issues declined significantly over time.
- **Frontend tech stack:** Next.js, TypeScript, Shadcn, Zod, React Hook Form, React Table.
- **Backend:** Node.js, Express, MongoDB, TypeScript (backend developed by my Co-Founder)
